 Open to relocation — UK / Netherlands / EU (English-speaking teams)

Professional Summary

Mid-level Full Stack Developer with 5+ years of experience designing, building, and modernizing enterprise and product-focused web applications. Strong experience across backend services, frontend frameworks, databases, and cloud-based deployment pipelines. Skilled in .NET and JavaScript ecosystems, API design, and application modernization. Comfortable working in remote, distributed teams and adapting systems to modern architectures for enterprise, fintech, and SaaS environments.

Technical Skills

Languages:

C#, VB.NET, C++, Python, TypeScript, JavaScript, HTML, CSS, Transact-SQL

Frameworks:

Angular, ASP.NET Web API, Blazor Server, Node.js, Electron.js

Databases:

Microsoft SQL Server, MySQL

ORMs:

Entity Framework, Sequelize

Cloud & DevOps:

AWS, CI/CD pipelines, GitHub Actions, Octopus Deploy, Bamboo, Bitbucket, Cloudflare Workers

Tools:

Visual Studio Code, Visual Studio, Cursor, Atlassian Products, Github, Gitlab, AWS, Cloudflare, Docker

Professional Experience

Experian — Remote

Full Stack Software Developer | Nov 2023 – Present

- Developed and maintained full-stack enterprise applications using C#, VB.NET, ASP.NET Web API, and SQL Server
- Built and maintained RESTful APIs supporting internal and external integrations
- Contributed to frontend development using ASP.net and modern JavaScript
- Supported cloud-based infrastructure and deployments on AWS using EKS, S3, API Gateway
- Worked with CI/CD workflows to automate build and deployment pipelines using Octopus, Bamboo, and Bitbucket
- Collaborated with distributed teams and improved system maintainability
- Converted older .net framework applications to .net 8 and above for full compatibility with docker to containerize in AWS EKS
- Utilize terraform to deploy AWS resources

National General — Remote

Software Developer | Nov 2022 – Nov 2023

- Upgraded a production Angular application from v4 to v12
- Developed backend services using C# and ASP.NET Web API
- Reworked Entity Framework data layers for modularity
- Maintained and optimized SQL Server databases
- Supported full stack development using Angular, TypeScript, LINQ, and SQL

SCI — Glens Falls, NY

Software Developer | Oct 2018 – Nov 2023

- Designed secure RESTful APIs using ASP.net Web API with JWT authentication, Helmet, and CORS
- Converted legacy VB.NET applications into C# console applications
- Built a Blazor Server application to modernize WinForms systems
- Developed tooling using Electron.js and Node.js
- Worked extensively with SQL Server and Transact-SQL

Education

Empire State University — *M.S. Computer Science*

Western Governors University — *B.S. Software Development*
